

Testimonials from Wastewater Treatment Plant Participants

May 23, 2016

Thank you for organising last week's tour of the Orangetown Waste Water Treatment Plant. The tour, led by plant manager Ken Skibinski provided fascinating insights into a critical and expensive piece of our town's infrastructure. Ken's willingness to explain the inner workings of the facility, to answer questions and to share his anecdotes from four decades in the business filled in many gaps in my knowledge of what happens when, usually without a second thought, we flush the toilet. I encourage other Orangetown residents to go on the tour and learn of a key behind-the-scenes component of the operation that keeps our Town running smoothly and safely. Please pass on my thanks to Ken for his time.

Regards, Andrew G.

May 19, 2016:

Just wanted to say thank you again for the water treatment plant tour last week. My daughter is still talking about it. She says some of it was really smelly but I'm glad she knows a bit more about what happens when you flush... :)
